

ENDLESSETTE OSBORN

Technical Artist

CONTACT

endlessette.com • endlessette@gmail.com

Technical artist with a fascination with the line between tech and art, between problem solving and creativity.

EXPERIENCE

Founder of Blobs Games

JUNE 2024 - PRESENT

Game Director | Technical Artist

- Directed and managed team of 18 to carry out game vision within tight deadlines for 9 games
- Facilitated communication between all disciplines for efficient development

Turtle Tech Art

OCT 2024 - PRESENT

Co-Founder | Operations Director

- Conceptualized learning pathways for expanding education in technical art
- Organized system for tech art jams to promote creativity and proactive learning

SJSU Game Development Club

FEB 2024 - PRESENT

Officer | Graphic Designer

- Overhauled and organized server to increase engagement for club members
- Facilitated event planning and revamped website
- Designed graphic layouts, mascot designs, posters and fliers for advertisement outreach

Figure Fighter Falty Short Film

DEC 2024 - JAN 2025

Visual Effects Artist

- Created particle systems to enhance visual style
- Designed real-time footprint ground deformation using render targets and vertex shaders for believability

SKILLSET

Programming Procedural Modeling Shaders Visual Effects
Rigging Procedural Animation 3D Modeling 2D/3D Animation
Graphics Programming Production Game Design

Unreal Engine Houdini Nuke Maya Blender 3DS Max
Adobe Suite Substance Unity

C++ C# Python VEX HLSL

EDUCATION

San Jose State University

AUG 2023 - MAY 2027

B.S. Technical Art (Interdisciplinary Studies)

- Game Development Club
- Shrunkenheadman Club
- ACM SIGGRAPH Student Chapter

Innovation & Entrepreneurship Certificate

MAY 2027

PROJECTS

Pier 5411 (Blobs Games)

MAY 2025 - PRESENT

Director / Tech Artist | Shipbuilding game in Unreal

- Managed team of 18 across various departments
- Created advanced systems for runtime ship customization and pseudo-multiplayer interaction
- Designed, developed, and scoped game based on playtesting

GoCones (Blobs Games)

JULY 2024

Director / Tech Artist | An ice cream truck sim in Unreal

- Created custom post-process shader to push art direction
- Designed infinite procedurally generating city
- Won "Best Game of the Semester" and "Best 3D Art" for SJSU Fall Game Jam

Procedural Jellyfish System

MAY 2025

Physically based & procedurally animated jellyfish in Unreal

- Utilized PBD system for physically simulated tentacles using Unreal Niagara VFX system
- Combined shaders and blueprints to align movement and tentacle simulation with shader vertex animation

Runtime Ship Customization

MAY 2025 - PRESENT

Player-controlled ship hull customization system in Unreal

- Created advanced system using geometry scripts for full player runtime control over the shape of hulls based on the shape of splines
- Created UI and systems for furniture/mast placement, flag painting and sailing ships
